## Profloating Joins With US Floating Solar

Tuesday, 22 August 2023

**REM**

**US Floating Solar has joined with Profloating, the world's most reliable floating solar partner, as its exclusive North American Agent. Profloating's mounting, mooring, and anchoring solutions work in various application scenarios, such as on drinking water reservoirs, water treatment plants, quarry lakes, in coastal areas, hydropower and pumped hydropower facilities, and power plant retention ponds.**

Profloating will work with US Floating Solar to set up and secure its North American supply chain and leveraging US Floating Solar's nearly 20 years of solar industry expertise, direct the marketing and selling of Profloating's industry leading floating solar products to utilities, EPC's, asset owners and developers in the renewable energy sector.

Profloating developed its solution in 2015 and launched the FLOTAR® floating PV system in 2018, the same year US Floating Solar was established. Together, US Floating Solar and Profloating provide the experience to ensure the design, engineering, and construction guidance for long term, safe and productive floating solar projects.

With leading industry experience, expertise and proven results, Profloating and US Floating Solar's achievements have positioned us as a top floating solar equipment mounting system provider and

US Floating Solar is proud to be part of the team according to Richard Heller, Managing Partner.

Profloating FPV floats are designed and engineered in the Netherlands and made in the USA for the North American Market.
